

SLS TECHNOLOGY

SWM *series*

Modular R.O. System
Sea Water Desalination
From 300 - 5,000 liters per day

Introduction

The SWM series water makers are designed for easy installation and use, making them suitable for sailboats and small powerboats. These compact units, measuring just 2-3 cubic feet, allow boaters to enjoy the benefits of a Rotek water maker without taking up too much space. The control panel allows for easy monitoring of the water maker, and the system can produce between 300 and 5000 liters of fresh water per day. This makes the SWM series a reliable and convenient choice for solo cruisers.

Specifications

Model	SWM-1000	SWM-2000	SWM-3000	SWM-5000
